👤 Summary

A highly motivated business intelligence specialist with 2 years of experience in a fast-paced environment. Strong understanding of SQL and relational databases. Experienced in creating complex dashboards using Excel, PowerPivot, and QlikView with particular experience in the e-Commerce industry. Skilled in Data Analytics / Data Visualization, ETL processes, Data Cleaning and Programming.

💼 Experience

Freelance - Data Analytics

📅 Nov 2022 - Present

My projects are the following:

- Data Exploration of COVID-19 dataset by using Microsoft SQL Server.
- Creating visualization of the European Airbnb dataset by using Tableau.
- Creating visualization of an e-commerce dataset by using Tableau.

BI Specialist / eMAG

📅 Sept 2021 - Oct 2022

My key responsibilities are the following:

- Full understanding and management of the QlikView application, creating documentation, training colleagues.
- Creating manual and automatic reports in time, using data from all of our systems.
- Continuous monitoring of the warehouse stocks, creating and running stock and product movement reports, immediate action in case of data discrepancy.
- Creating documentation for system processes.
- Supporting and training system users, creating training material.
- Liaising with local and international peers.

MIS Superuser / eMAG

📅 March 2020 - Sept 2021

My key responsibilities were the following:

- Overall responsibility for IT functionality in a fast-paced order fulfilment centre covering order, warehouse and delivery management systems
- Acts as the primary support for WMS users
- Challenge working practices and formulate initiatives for improvement
- Maintenance of system documentation, including work instructions
- Engaged in database processing for producing automated reports and KPI's related to the warehouse operation.
- Configure PDA's, routers, access points, servers etc.
- Troubleshoots IT related problems and issues.
